Volume 136 1983

Table of contents

No. 1 1–232 issued on October 17, 1983
No. 2 233–434 issued on November 2, 1983
No. 3 435–622 issued on November 15, 1983

Corrections 621

Nucleic acids, protein synthesis, and molecular genetics

Affinity labeling of succinyl-CoA synthetase from *Escherichia coli* by the 2',3'-dialdehyde derivative of adenosine 5'-diphosphate
J. S. Nishimura, T. Mitchell, G. E. Collier, J. M. Matula, and D. J. Ball 83–87

Signal sequences, secondary modification and the turnover of miscompartmentalized secretory proteins in *Xenopus* oocytes
C. D. Lane, J. Champion, and R. Craig 141–146

Preparation and properties of monomercurated tRNA
G. G. Abdurashidova, M. G. Nargisyan, and E. I. Budowsky 147–150

Gene fusions using the *ompA* gene coding for a major outer-membrane protein of *Escherichia coli* K12
U. Henning, S. T. Cole, E. Bremer, I. Hindennach, and H. Schaller 233–240

Purification of the elongation factor Tu (EF-Tu) from the cyanobacterium *Spirulina platensis*
O. Tiboni and O. Ciferri 241–244

Precise localization of several covalent RNA-RNA cross-link in *Escherichia coli* 16S RNA
A. Expert-Bezançon, M. Milet, and P. Carbon 267–274

Purification and characterization of two ribosomal proteins of *Saccharomyces cerevisiae*. Homologies with proteins from eukaryotic species and with bacterial protein EC L11
F. Juan-Vidales, F. Sánchez Madrid, M. T. Saenz-Robles, and J. P. G. Ballesta 275–281

Precursor nucleotides at the 5' end are not required for processing by RNase E at the 3' end of 5-S rRNA
J. Szeberényi, M. K. Roy, and D. Apirion 321–326

Evidence that 2-allyl-2-isopropylacetamide, phenobarbital and 3,5-diethoxycarbonyl-1,4-dihydrocollidine induce the same cytochrome P_{450} mRNA in chick embryo liver
J. D. Brooker, G. Srivastava, I. A. Borthwick, B. K. May, and W. H. Elliott 327–332

DNA topoisomerase I from calf thymus is inhibited *in vitro* by poly(ADP-ribosylation)
J. Jongstra-Bilen, M.-E. Ittel, C. Niedergang, H.-P. Vosberg, and P. Mandel 391–396

Association of a polyuridylate-specific endoribonuclease with small nuclear ribonucleo-proteins which had been isolated by affinity chromatography using antibodies from a patient with systemic lupus erythematosus
M. Bachmann, F. Trautmann, R. Messer, R. K. Zahn, K.-H. Meyer zum Büschenfelde, and W. E. G. Müller 447–451

Repair of O^6-ethylguanine DNA lesions in isolated cell nuclei. Presence of the activity in the chromatin proteins
A. Renard and W. G. Verly 453–460

Properties of the chromatin repair activity against O^6-ethylguanine lesions in DNA. Mechanism of the reaction
A. Renard, W. G. Verly, J. R. Mehta, and D. B. Ludlum 461–467

Mutual conformational changes of tryptophanyl-tRNA synthetase and $tRNA^{Trp}$ in the course of their specific interaction
S. Beresten, V. Scheinker, O. Favorova, and L. Kisselev 559–570

Protein chemistry and structure

The complete amino acid sequence of oncomodulin – a parvalbumin-like calcium-binding protein from Morris hepatoma 5123tc
J. P. Macmanus, D. C. Watson, and M. Yaguchi 9–17

Covalent structure of chicken pepsinogen
M. Baudyš and V. Kostka 89–99

Evidence for an essential histidine residue in glucose dehydrogenase from *Bacillus megaterium* and sequence analysis of the peptides labeled with bromoacetyl pyridine
W. Ulmer, M. Fröschle, and K.-D. Jany 183–194

The primary structure of *Escherichia coli* glutaredoxin. Distant homology with thioredoxins in a superfamily of small proteins with a redox-active cystine disulfide/cysteine dithiol
J.-O. Höög, H. Jörnvall, A. Holmgren, M. Carlquist, and M. Persson 223–232

Acetylation and methylation sites in histone H4 from *Physarum polycephalum*
J. H. Waterborg, S. R. Fried, and H. R. Matthews 245–252

Primary structure of protamine from the Northern pike *Esox lucius*
W. Speckert, B. Kennedy, S. L. Daisley, and P. Davies 283–289

Coupling between fatty acid binding and sulfhydryl oxidation in bovine serum albumin
K. Takabayashi, T. Imada, Y. Saito, and Y. Inada 291–295

Fluorescence and chemical modification of tryptophan as probes of structure of GTP:AMP phosphotransferase from beef heart mitochondria
A. G. Tomasselli, J. J. Dougherty, Jr, and L. H. Noda 297–302

p-HMW-Collagen, a minor collagen obtained from chick embryo cartilage without proteolytic treatment of the tissue
P. Bruckner, R. Mayne, and L. Tuderman 333–339

A comparison of the structure and activity of cat and trout muscle pyruvate kinases
R. N. Harkins, J. C. Nocton, M. P. Russell, L. A. Fothergill, and H. Muirhead 341–346

Structure of the Mo-Fe protein component of *Azotobacter vinelandii* nitrogenase. Analytical ultracentrifugation and electron microscopy studies
G. Voordouw, H. Haaker, J. F. L. van Breemen, E. F. J. van Bruggen, and R. R. Eady 397–401

The multifunctional polypeptide chain of rabbit mammary fatty acid synthase contains a domain homologous with the acyl carrier protein of *Escherichia coli*
A. D. McCarthy, A. Aitken, and D. G. Hardie 501–508

Proteins from the sperm of the bivalve mollusc *Ensis minor*. Co-existence of histones and a protamine-like protein
V. Giancotti, E. Russo, M. Gasparini, D. Serrano, D. Del Piero, A. W. Thorne, P. D. Cary, and C. Crane-Robinson 509–516

Isolation and characterization of the three fractions (DE-I, DE-II and DE-III) of rat-liver Z-protein and the complete primary structure of DE-II
K. Takahashi, S. Odani, and T. Ono 589–601

Enzymology

Inhibition of ADP-induced platelet aggregation by reduced factor Xa
A. K. Sinha and R. W. Colman 57– 62

Purification, subunit structure and immunological comparison of fructose-bisphosphate aldolases from spinach and corn leaves
I. Krüger and C. Schnarrenberger 101–106

Forskolin regulation of liver membrane adenylyl cyclase
L. Birnbaumer, D. Stengel, M. Desmier, and J. Hanoune 107–112

Inhibition of metalloendopeptidases by 2-mercaptoacetyl-dipeptides
S. Blumberg and Z. Tauber 151–154

Galactokinase of *Vicia faba* seeds
P. M. Dey 155–159

Interaction of mature, unglycosylated and cell-free synthesized rat α1-proteinase inhibitor with elastase
T. Andus, V. Gross, T.-A. Tran-Thi, and P. C. Heinrich 253–257

Stereochemistry of the rearrangement of 2-aminoethanol by ethanolamine ammonia-lyase
D. Gani, O. C. Wallis, and D. W. Young 303–311

Elementary steps in the reaction of the pyruvate dehydrogenase complex from pig heart. Kinetics of thiamin diphosphate binding to the complex
B. Sümegi and I. Alkonyi 347–353

The function of N^{α}-acetylation of the eye-lens crystallins
H. P. C. Driessen, F. C. S. Ramaekers, W. T. M. Vree Egberts, H. J. Dodemont, W. W. de Jong, G. I. Tesser, and H. Bloemendal 403–406

Purification and characterization of proteases from the polychaete annelid *Sabellaria alveolata* (L.)
G. Peaucellier 435–445

Phosphorolytic activity of *Escherichia coli* glycyl-tRNA synthetase towards its cognate aminoacyl adenylate detected by ^{31}P-NMR spectroscopy and thin-layer chromatography
J. J. Led, W. K. Switon, and K. F. Jensen 469–479

The calmodulin-dependent glycogen synthase kinase from rabbit skeletal muscle. Purification, subunit structure and substrate specificity
J. R. Woodgett, M. T. Davison, and P. Cohen 481–487

Minactivin: A human monocyte product which specifically inactivates urokinase-type plasminogen activators
J. P. Golder and R. W. Stephens 517–522

ATP-AMP phosphotransferase from *Paracoccus denitrificans*
S.-S. Yeh, A. G. Tomasselli, and L. H. Noda 523–529

Characterization of phosphodiesterase catalytic sites by means of cyclic nucleotide derivatives
D. Couchie, G. Petridis, B. Jastorff, and C. Erneux 571–575

Carbohydrates, lipids and other natural products

Aglycon specificity of fetal calf liver and ovine and porcine submaxillary gland α-*N*-acetylgalactosaminide α2→6 sialyltransferase
M. L. E. Bergh and D. H. van den Eijnden 113–118

Structural studies on the non-toxic lipid A from *Rhodopseudomonas sphaeroides* ATCC 17023
P. V. Salimath, J. Weckesser, W. Strittmatter, and H. Mayer 195–200

Isolation and structural characterization of five major sialyloligosaccharides and a sialylglycopeptide from normal human urine
J. Parkkinen and J. Finne 355–361

Ornithine-containing lipid of *Bordetella pertussis*, a new type of hemagglutinin
Y. Kawai and I. Yano 531–538

Physical biochemistry

Fourier-transform infrared spectroscopy applied to rhodopsin. The problem of the protonation state of the retinylidene Schiff base re-investigated
F. Siebert, W. Mäntele, and K. Gerwert 119–127

High-resolution proton NMR as indicator of a silent mutation in the haem cavity of a monomeric allosteric haemoglobin
G. N. La Mar, R. R. Anderson, V. P. Chacko, and K. Gersonde 161–166

Electron paramagnetic resonance and other properties of hydrogenases isolated from *Desulfovibrio vulgaris* (strain Hildenborough) and *Megasphaera elsdenii*
H. J. Grande, W. R. Dunham, B. Averill, C. Van Dijk, and R. H. Sands 201–207

A potent new dipeptide inhibitor of cell sickling and haemoglobin S gelation
I. M. Franklin, R. I. Cotter, R. C. Cheetham, J. F. Pardon, A. J. Hale, and E. R. Huehns 209–214

Effect of troponin-tropomyosin complex and Ca^{2+} on conformational changes in F-actin induced by myosin subfragment-1
Y. S. Borovikov and N. B. Gusev 363–369

Association of rabbit muscle glycolytic enzymes with filamentous actin. A counter-current distribution study at high ionic strength
H. Westrin and L. Backman 407–411

Membranes and bioenergetics

Localization of the tight ADP-binding site on the membrane-bound chloroplast coupling factor one
J. J. Czarnecki, M. S. Abbott, and B. R. Selman 19– 24

Changes in the lateral distribution of the light-harvesting chlorophyll-*a*/*b*-protein complex induced by its phosphorylation
U. K. Larsson, B. Jergil, and B. Andersson 25– 29

Characterization of the epidermal-growth-factor-dependent phosphorylation system from normal mouse-liver sinusoidal plasma membranes
J.-C. Ehrhart, E. Rollet, O. Komano, C. Creuzet, and J. Loeb 31– 39

High-field phosphorus NMR studies of the stoichiometry of the lactate/proton carrier in *Streptococcus faecalis*
S. J. Simpson, M. R. Bendall, A. F. Egan, R. Vink, and P. J. Rogers 63– 69

A high-affinity, calmodulin-dependent Ca^{2+} pump in the basal-lateral plasma membranes of kidney cortex
P. Gmaj, M. Zurini, H. Murer, and E. Carafoli 71– 76

The stoichiometry of proton translocation through H^+-ATPase of rat-liver mitochondria
K. F. Sholtz, I. A. Gorskaya, and A. V. Kotelnikova 129–134

The function of cytoplasmic membrane of *Paracoccus denitrificans* in controlling the rate of reduction of terminal acceptors
I. Kučera, J. Laučík, and V. Dadák 135–140

Correlation between calmodulin-dependent increase in the rate of calcium transport and calmodulin-dependent phosphorylation of cardiac sarcoplasmic reticulum. Characterization of calmodulin-dependent phosphorylation
B. Plank, C. Pifl, G. Hellmann, W. Wyskovsky, R. Hoffmann, and J. Suko 215–221

Carnitine palmitoyltransferase I. Inhibition by D-galactosamine and role of phospholipids
O. Sire, M. Mangeney, J. Montagne, R. Nordmann, and J. Nordmann 371–375

Cholinergic synaptic vesicles from *Torpedo marmorata* contain an atractyloside-binding protein related to the mitochondrial ADP/ATP carrier
H. Stadler and E. M. Fenwick 377–382

Purification, characterisation and reconstitution of glutaconyl-CoA decarboxylase, a biotin-dependent sodium pump from anaerobic bacteria
W. Buckel and R. Semmler 427–434

Interaction between photoexcited rhodopsin and peripheral enzymes in frog retinal rods. Influence on the postmetarhodopsin II decay and phosphorylation rate of rhodopsin
C. Pfister, H. Kühn, and M. Chabre 489–499

Kinetic effects of chemical and physical uncoupling on the energy-transducing ATPase from spinach chloroplasts
P. A. Sherman and M. J. Wimmer 539–543

Evidence for an ATP-driven proton pump in rat thyroid phagolysosomes. Effects of protonophores and ionophores
F. Fouchier and J. Dang 553–557

Interaction of α-1,2-mannosidase with anionic phospholipids
W. T. Forsee and J. S. Schutzbach 577–582

Cellular biochemistry and metabolism

Solubilization and characterization of an angiotensin II binding protein from liver
I. Sen, K. F. Jim, and R. L. Soffer 41– 49

Protein synthesis in differentiated and dedifferentiated hepatoma cell lines. Effect of glucocorticoids
Z. Bősze, P. Arányi, and A. Venetianer 77– 82

Influence of species and sex on cholesterol 7α-hydroxylase activity in experimental animals
E. Bosisio, G. Galli, and M. Galli Kienle 167–173

On the mechanism by which glucocorticoids cause the activation of glycogen synthase in mouse and rat livers
M. Laloux, W. Stalmans, and H.-G. Hers 175–181

Intracellular forms of transferrin oligosaccharide chains in rat liver
H. Nakada, H. Kohno, T. Kawasaki, and Y. Tashiro 259–265

The effect of dibutyryladenosine 3′,5′-monophosphate on the synthesis of bile salts in isolated hepatocytes from rat
K. M. Botham and G. S. Boyd 313–319

Subcellular fractionation of porcine neutrophils by nitrogen cavitation and sucrose-density-gradient centrifugation
R. Chibber and A. G. Castle 383–389

The effect of heart and skeletal muscle troponin complexes and calmodulin on the Ca^{2+}-dependent reactions of phosphorylase kinase isoenzymes
K. Yoshikawa, H. Usui, M. Imazu, M. Takeda, and S. Ebashi 413–419

Hepatocyte heterogeneity in glutamate uptake by isolated perfused rat liver
D. Häussinger and W. Gerok 421–425

The interaction of nocardicin A with the penicillin-binding proteins of *Bacillus megaterium* KM
J. A. Todd, J. R. Yon, and D. J. Ellar 545–551

Reversibility characteristics of glucose-induced trehalase activation associated with the breaking of dormancy in yeast ascospores
J. M. Thevelein and K.-A. Jones 583–587

Novel approach to the study of the regulation of hormone-sensitive lipase in rat adipocytes. Permeabilization of cells with digitonin
R. A. Mooney, R. D. Ebersohl, and J. M. McDonald 603–608

Actions of glucagon on flux rates in perfused rat liver. 1. Kinetics of the inhibitory effect on glycolysis and the stimulatory effect on glycogenolysis
R. Kimmig, T. J. Mauch, W. Kerzl, U. Schwabe, and R. Scholz 609–616

Actions of glucagon on flux rates in perfused rat liver. 2. Relationship between inhibition of glycolysis and stimulation of respiration by glucagon
R. Kimmig, T. J. Mauch, and R. Scholz 617–620

Developmental biochemistry and immunology

Antigenic determinants of human placental and testicular placental-like alkaline phosphatases as mapped by monoclonal antibodies
J. L. Millán and T. Stigbrand 1– 7

Purification of stalk-cell-inducing morphogens from *Dictyostelium discoideum*
R. R. Kay, B. Dhokia, and K. A. Jermyn 51– 56
